

CAPA CAPERS

The CAPA faculty has been busy over the past few weeks. Students in Visual Art, Photography and Music have been developing their skills by refining their efforts on major artworks and musical compositions.

Mr Broadbent's Music technology classes are using computers to arrange multilayered arrangements of the music that they have composed. As such, Mr Bonaccorso's investment in computer technology has begun to effect some pleasing changes in the outcomes achieved by students.

This is also the case in Photography, where Ms Reeves' classes are producing digitally manipulated images that use the immense power of Photoshop to create stunning and unique results.

Mr Beedham's Ceramics class are producing high quality work based on a sea theme, with highly developed explorations of surface texture. They are to be commended for their sustained approach to the presentation of a concept by the use of clay and all its potential.

Year 12, 2007 students are about to sit the HSC Written Examination, while Year 11 have moved onto the HSC course and have begun to experiment with ideas for their Body of work. This is a challenging time for Year 11 as they must decide on a concept to explore in their artworks, and then explore ways to represent it with the use of materials. We wish them good luck in the final resolution of their ideas over the coming weeks.

Mr J Beedham
CAPA Head Teacher(Relieving)

HSIE HIGHLIGHTS

IN THE OFFICE

Business Services students have been very busy since the beginning of the term. We have been exploring the exciting yet demanding world of mail or as we would like to call it 'Information Distribution.' From simple letters to technological mail such as email and faxes, students are now experts in compiling, sorting and distributing effectively. Students are such mail aficionados that they have developed a list of five key addressing tips for the humble letter:

1. Ensure all the information is accurate and reliable
2. Include a postcode (go to www.auspost.com.au to locate a postcode)
3. Ensure you write the suburb in capitals
4. Write on the envelope in a clear and legible fashion
5. Check out www.auspost.com.au for further information

Things are about to get even more interesting (if that is possible) later in the term, when students will embark upon another work placement.
